

Maintenance Instruction

- ✧ Regular maintenance will keep the floor surface intact and extend its durability. The cycle of the maintenance depends on its natural condition and intensity. The floor must be cleaned daily either by mop or by vacuum cleaner. Hand cleaning is suggested for a small area, and for a medium-sized area machine cleaning is preferable.
- ✧ No cleaning devices are permitted if they damage the floor. One way clean the floor with neutral detergent and afterwards wash the floor with clean water and dry it by water suction machine ,or the mop .In this way the filth may be avoided to accumulate on the floor.
- ✧ One may use the same way to clean the footsteps and stain on the floor.
- ✧ Almost all the sports flooring have court lines.(either painted or fixed on the surface)The maintenance of these lines is necessary while the sports flooring is maintained, so that these lines will not be damaged, or moved out of their places.

Warning

Placing doormat at the entrance is needed.

- ✧ Never step on the court with leather shoes, high-heeled shoes, or sports shoes which maybe easily fade.
- ✧ Never cut, squeeze, or press .The surface should not be abraded by hard articles in order to avoid breaking or damaging.
- ✧ Never use corrosive chemicals as acid and alkali on the flooring and keep it off fire and high temperature to avoid the deformation.
